PROFILE <- the link to my portfolio

Currently, a fourth-year software engineering student at University of Technology, Sydney with enough programming skills for the industry. Humbly, applying for an internship for my engineering degree. Finishing six Software Engineering Studios is mandatory to graduate Bachelor of Software Engineering. I have finished four of them and currently in my fifth studio.

EXPERIENCE

Front end role for Studio 1A   • 2019

An Ecommerce website for an electronic store

Started learning HTML, CSS and a little bit of Javascript right after finishing two subjects with Java.

- Created a log in and registration screens for the team

Front end role for Studio 1B   • 2020

Web app for a Restaurant

Using more of HTML and CSS. However, the group chose Django framework for the project. Had a chance to get in touch with python web application development.

- Developed a viewing order page, Django focus more on backend.

Front end role for Studio 2A   • 2020

An educational web app

The website is for teacher to create classrooms and to allow the students to join the classes. The group used MERN stack for the project. So far, it was the best studio I had at university.

- Learn React app which motivated me to keep on learning about since then.
- Developed 3 different pages for teacher (user).

Front-end developer

EXPERTISE

TECHNICAL

- MongoDB
- Github
- Data Structure
- Python
- Figma

LANGUAGE

- ENGLISH
- BURMESE

Speak a little bit of Mandarin

INTERESTS

- Hiking
- Swimming
- Programming
- Guitar
- Calligraphy
- Researching
- Gaming
- Travelling

EXPERIENCE

Front end role for Studio 2B

- 2021

A mobile apps for taking attendance

The team used MERN stack again for the project but with React Native this time. Backend was the same. Therefore, understanding the whole project was easy.

- Learned react native while does not need as much styling as building a web app
- Firsthand experience with Formik library for UI design
